

CS 145A & CS 145B Lab Team Contract

Term: Spring 2016

Students that decide to work in teams of two must read this carefully, complete, sign, and return it to the instructor or course TA.

Specifically, members of a team must agree to work together on some or all of the 5 course projects required in CS 145A and CS 145B. Each team member understands that ultimately it is each and every student's individual responsibility to complete the work and submit it on time. The instructor will not tolerate any team-related excuses for late or incomplete work. This includes situations such as one team member dropping out, damaging the tools & lab material, etc. The instructor strongly recommends that you carefully select a teammate. If in doubt, work solo.

I (print name) Andrew Kim understand that ultimately I am responsible for timely completion of each and every project.

I (print name) Josh Alpert understand that ultimately I am responsible for timely completion of each and every project.
